

IF YOU PLAN TO SHARE YOUR LIFE WITH A COMPANION ANIMAL, *build the home it needs*

Check these points to ensure *responsible ownership of your cat*

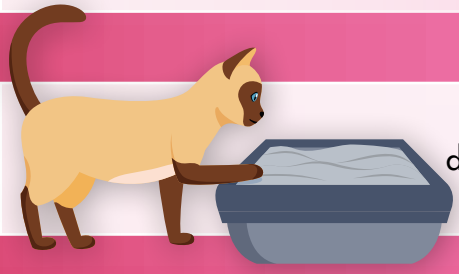

Life expectancy of cats ranges from 12 to 18 years. Bear it always in mind since the **commitment is for the animal's entire life**.

Cats usually prefer being in **high places**, with a good view of the surroundings, since it gives them a feeling of greater control. This can pose a danger in your home, so you should install **protection elements**, such as nets on windows, terraces and balconies to prevent them from falling into the void.

Get a **tower scratching post**, they are indispensable for cats, as they allow them to scratch, serve as an elevated platform and are a great play centre.

Try and have two or more **litter boxes** for each cat, well separated in different spots of the house. In this way, the cat will have more than one place to relieve itself.

Cats can **stimulate each other** very completely, which is why it is usually recommended to raise them in pairs from a young age.

If you are going to travel, it is important that you know that **cats prefer to stay at home** and have someone take care of them.
