

# IF YOU PLAN TO SHARE YOUR LIFE WITH A COMPANION ANIMAL, *build the home it needs*

## Check these points to ensure *responsible ownership of your dog*

Life expectancy ranges from 10 to 13 years, and the smaller the breed, the longer they tend to live. Bear it always in mind since the **commitment is for the animal's entire life**.

**Exploratory behaviour** enriches their lives greatly, since they can recognise people and other animals through scent. **Daily walks** will be essential so that it can socialise with other dogs.

At home, they prefer having their **bed close** to the places where the rest of the family members usually are. When planning feeding, **avoid onion, chocolate, grapes or nuts**, and provide products designed to clean the teeth during chewing.

To improve your coexistence with your dog, you can consult an **ethologist**, who studies animal behaviour. You can also use **training and play** sessions to better control your dog's behaviour and strengthen the bond, communication and the development of the dog's brain.

If you are going to travel, be aware that there are **authorised kennels** that can take care of your dog in a responsible manner.
